9000 Brine Valve Stem

In order to make it easier to distinguish the 9000 Brine Valve Stem from the 5600 Brine Valve Stem, the Teflon Coating on the 9000 Brine Valve Stem will be changed from green to gray. This change will occur in late July 1991. There will be no change in the part number, only in the coating color.

As always, thank you for using Fleck Controls.

Sincerely,

Fleck Controls, Inc.
