## Improved 2" Plastic Remote Meter Bracket

We have undergone an improvement to the remote meter timer bracket. This improvement will decrease the movement the bracket had holding the remote meter power head timer. We added four tabs to stop the side-to-side movement and decreased the slot size for the up and down movement. This bracket will be in production September 20, 2000.

New StyleOld Style

## 2900 Metered Valve Units

The nut and nipple (union) will no longer be attached to the 2900 lower valve body. The meter will come complete inside the valve box. We are changing the box inserts to accommodate this change. These changes will be implemented approximately October 2, 2000.

As always, thank you for using Fleck controls.

Sincerely,  
Pentair Water Treatment, Inc.
