New 1" NPT Brass Yoke

We have improved the 1" NPT brass yoke by implementing an injection molding process. The previous yoke was poured brass. This new version has several improvements over the previous design, including:

- 1) Improved material process, which reduces porosity and increases quality.
- 2) Arrows showing flow direction will be molded into the yoke.
- 3) Smoother surface finish gives a more finished look.

Below is a sample of each version of the brass yoke.

**Old 1" Brass Yoke
13398**

**New 1" Brass Yoke
13398-00**

An updated 1" BSP version will be released in 4th quarter 2001 or 1st 2002.

As always, thank you for using Fleck controls.

Sincerely,
Pentair Water Treatment, Inc.
