1650 Brine Valve Configuration Change

We have recently made changes which will require 1600 brass brine valves for all 1500, 2510, 2750, 2850, and 2900 control valve configurations with PVC or stainless steel injectors. This option will be available at no additional price over the current plastic 1650-brine valve.

As always, thank you for using Fleck controls.

Sincerely,
Pentair Water Treatment

Jay Runkle
