2" Plastic Meter Outlet O-Ring Improvement

Effective immediately we are changing part number **19485** outlet meter o-ring to part number **40666** gasket. The inlet meter o-ring (**19485**) will remain the same. Installing the new gasket will help absorb some variation in mis-aligned plumbing, which will help prevent subsequent breaking of the hex head nut. Keep in mind, hand tightening the meter nuts is sufficient enough to seal, on the 2" plastic meter.

As always, thank you for using Fleck controls.

Sincerely,
Pentair Water Treatment, Inc.
