Spare Pins Added To Program Wheel On 3200 Series Timers

Effective April 1, 2002, we will begin adding 5 spare timer pins to the **program wheel** on 3200 meter delayed, meter immediate and time clock series timer versions (p/n 13880 and 13880-02). These will replace the spare pins currently added to the **timer housing**.

The spare pins are to add additional time for backwash or rapid rinse cycles if needed. If you require more additional spare pins, they can be ordered using part number 15493.

As always, thank you for using Fleck controls.

Sincerely,
Pentair Water Treatment, Inc.
