June 2005

Color Change on 7000 High Flow Piston End Plug

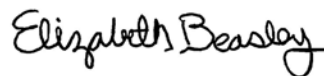

Effective June, 2005, the end plug on the 7000 high flow piston assembly is changing to a gray. The end plug assembly for the standard piston will remain black. This will make it easier to differentiate between a standard and a high-flow piston. The piston assembly part numbers will not change; please see the chart below for additional information.

Flow Rate (GPM)*			
Piston	Standard (P/N 61453 -10)	High Flow (P/N 61452-10)	Filter (P/N 61452-20)
Continuous (15 psi drop)	27.7	35.8	36.7
Peak (25 psi drop)	35.5	46	47.5
Cv (flow @ 1 psi drop)	7.1	9.2	9.5
Max. Backwash (25psi drop)	7.4	15.8	31.3
End Plug Color	Black	Gray	Black

* 50 psi inlet, Valve Alone

As always, thank you for using Fleck Controls.

Sincerely,
 Pentair Water, Inc.
