Product Application Service General

July 2005

New Name for 2900 Single Piece Casting (2900s)

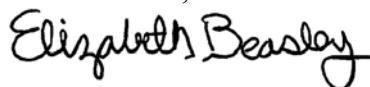

Effective July of 2005, the new 2900 single piece casting will be called the 2900s. The name change was made in order to make it easier to identify the single piece casting from the previous two-piece 2900 casting. As well, the same part numbers and assemblies apply.

Please reference Performance Bulletin #431 for additional information.

As always, thank you for using Fleck Controls.

Sincerely,
Pentair Water, Inc.
