1700 Injector Cap Changes

Beginning in January of 2006 as a rolling change, the 2900s (single piece casting) will have changes to the injector cap. The brass injector cap is used on the 6C & 7C to allow for the proper amount of feed water to enhance the vacuum, ensuring a proper regenerate draw rate.

Please see the below part numbers and descriptions for additional information.

Part #	Injector Cap	Injector Size	Ordering Description
11893	Stainless Steel	3C, 4C, 5C	Cap, Injector, SS
10228	Brass	6C, 7C	Cap, Injector

As always, thank you for using Fleck Controls.

Sincerely,
Pentair Water, Inc.
