

Performance Bulletin

December 2006

Brass Meters Available with Plastic Caps

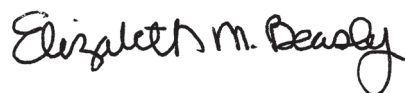

At Pentair, we are continuously looking for new and efficient ways to provide high quality products to our customers. Over the past year, the industry has experienced extensive cost increases in brass due to fluctuations in the metal market. To ease some of the cost pressures from the increases in brass, we have reconfigured our cold water 1", 1-1/2", and 2" brass meters and extended range meters. The brass meters have been reconfigured to incorporate a plastic meter cap instead of brass. This change has been tested and verified to meet all of the same performance standards as our brass meter caps including our NSF listings. The affected meters are listed on page two of this bulletin. These changes will begin to take effect on December 15, 2006.

Hot water meters are not affected by this change. All hot water meters still require the brass meter cap and a hot water impeller, and need to be ordered using the hot water assembly number.

As always, thank you for using Fleck Controls.

Sincerely,
Pentair Water, Inc.
