## **NSF44 Certified Systems Available**

Over the past three years, we have been involved in certification of systems using Pentair components to the NSF/ANSI Standard 44.

In this effort, we offer our customers the option to transfer these listings to their own systems provided they meet the criteria of the certifying organization. In order to efficiently transfer the listing, the components need to match the Pentair systems unless a substitution is specified. If components other than those listed in the certified systems are used, additional testing time and costs may apply.

### **NSF/ANSI Standard 44**

This standard covers residential cation exchange water softeners designed to reduce hardness from public or private water supplies.

Please visit the following link for a current listing of our certified systems and sizes available:

<http://www.nsf.org/Certified/DWTU/Listings.asp?Company=44450&Standard=044>

or

[www.wqa.org](http://www.wqa.org)

To learn more about system certification steps, please contact your regional sales manager or call the WQA (Water Quality Association) or NSF International at the following numbers:

WQA: 1-630-505-0160

NSF: 1-800-NSF-MARK

As always, thank you for using Fleck Controls.

Sincerely,  
Pentair Water, Inc.
