

Performance Bulletin

April 2007

6700ET Updated to 6700XTR

Effective April 30, 2007, the 6700ET will be updated to the new 6700XTR timer. The new 6700XTR timer offers the same functionality as the current ET electronics, but includes new functions such as unit capacity, water hardness, capacity safety factor, volume override, and others.

Features & Benefits:

- **Enhanced, Full-Text, 2 x 16 Character Backlit Display**
 - Easy-to-read in dark areas
- **Intuitive Programming**
 - Easy-to-understand, user-friendly programming
- **Power Back-Up**
 - Keeps time, eliminating the need for reprogramming
- **Diagnostics Mode**
 - Provides diagnostic information to assist in troubleshooting

All existing 6700ET's will continue to be serviced. If an existing 6700ET powerhead needs replacement and is under warranty, it will be replaced with a new 6700XTR powerhead. If a 6700ET timer assembly needs replacing and is under warranty, a new 6700XTR timer assembly will be available under part number 42274.

For additional information, please contact your Pentair customer service representative.
