

# Performance Bulletin

August 2007

## New XT Electronic Timer Available

Effective August 6th, 2007, the new XT electronic timer will be available for commercial applications, replacing the current ET timer. The 2510, 2750, 2850, 2900, 3150, 3900, 9000, 9100, and 9500 valves will have this timer as an ordering option.

The new XT offers the same functionality as the ET electronics with several new features.

### Features & Benefits:

#### Full-Text, 2 x 16 Character, Backlit LCD Display

- Highly-Visible in Dimly-Lit Areas

#### Intuitive, User-Friendly Programming

- Easy-to-Understand and Program

#### Diagnostics Mode

- Assists in Troubleshooting

#### New LED Lights

- Blue LED signals in Service
- Green LED signals in Regeneration
- Red LED signals an Error Condition

Remote meters that use ET electronics will continue to be offered. Please watch for an upcoming performance bulletin with availability information.

For additional information, please contact your Pentair customer service representative.
