June 2007

New 5600 Owner's Manual

Effective on July 6th, 2007, a new 5600 Owner's Manual will be shipped with the 5600 residential valves instead of the current 5600 Service Manual. The current 5600 Service Manual (part number 40106) is an 8-1/2" x 11", 36-page booklet, and contains detailed technical information which would not be needed by the home owner. The new 5600 Owner's Manual (part number 42447), will be a smaller 5-1/2" x 8-1/2", 8-page booklet containing information on how to set the time, program wheel, and how to force a manual regeneration.

Between June 8th and July 6th, both an Owner's Manual and a Service Manual will be shipped with 5600 valve orders. On July 6th, just the Owner's Manual will be shipped with 5600 valve orders.

If the 5600 Service Manual is preferred, please contact your customer service representative to replace part number 42447 with 40106 on your order. In the future additional residential valves will be updated to include the Owner's Manual only and the Service Manual will be optional.

You can also download the Service Manual at our website (<http://www.fleckcontrols.com>) under the "Tech Support" section and then "Manuals & Bulletins". If you are not registered on this website, you will need to sign up for access to download the Service Manual.
