New Remote Option Available for 3214NXT

Effective immediately, there will be a new remote option available for the 3214NXT timer. This will allow the user to mount the controller in a more desirable location for ease of use.

The remote option comes with an installed 25' cable which connects to any 2750, 2850, 2900, 3150, or 3900 valve via a 19-pin connector.

This option is useful for large tanks or tight locations where the controller would otherwise be hard to reach.

Thank you, we appreciate your continued business.
