

SXT Controller

Availability Date

Projected 8/4/08 based on remaining SE inventory levels.

Geographical Markets

US, Canada, Latin America, Europe, Asia

Product Overview

Fleck's new SXT Controller is the next generation upgrade to its current SE Controller platform. It features the same basic functionality of the SE, but with a few added extras. The SXT Controller offers a larger, backlit display, new diagnostic view, improved programming code options and a super capacity power backup of over 48 hours.

Customers with experience on the Fleck SE Controller will find the SXT easy to understand and intuitive to program.

Available for use with the following Fleck Control Valve families: ProFlo, TwinFlo, 2510, 2750, 2850, 5600, 9000, 9100 and 9500.

Why is Pentair offering this product?

Pentair is migrating to the new SXT electronics platform to provide customers with a broader range of programming options, improved functionality and overall performance capabilities.
